ORIGINAL CARLSBAD SPA COSMETICS
The story of our cosmetics began already 25,000 years ago. It was at this time that the oldest components of the Carlsbad thermo-mineral waters, which make up the basis of CARL’s cosmetics brand, were created. Raindrops seeping into the pure nature of the mountains Doupovské hory, Slavkovský les and Krušné hory began their unusual journey toward the volcanic center of the earth and back. And during this journey, the water obtained its unique characteristics and is enriched with minerals and main, secondary and trace elements, so that it would later come back - heated and enriched - to the surface in the form of a natural healing source. Centuries later, these miraculous waters are used for healing. We are now beginning to use their beneficial effects in cosmetics as well.
The exclusive CARL’S cosmetics brand is closely connected with the world-renowned spa town. Its products draw their power from the natural healing sources of Carlsbad, into which the local nature has put all its energy for thousands of years - in particular the Carlsbad thermo-mineral water, peat and kaolin. They also make up the main components for the individual cosmetics lines THERMAE, PEAT CARE and PURE KAOLIN. They are developed, using the beneficial effects of the local natural healing sources and many years of experience with balneotherapy. At the same time, we also considered the requirements of modern cosmetics - the products therefore contain many highly valuable and quality active ingredients and technologies. Doctors and dermatologists take part in the development of the cosmetics.
The Carlsbad thermo-mineral water is completely unique. Thanks to its healing effects, a famous spa tradition was created, the city always attracted prominent people of their era and there is still much interest in the spas today. The composition of the mineral water is very complex and therefore mysterious, its exact origin has still not been scientifically explained. The Carlsbad thermo-mineral water makes up the basis of the THERMAE cosmetics collection.

Peat is a natural source of mineral ingredients that are important for our body and skin. The blend of biological active humin ingredients works as a helper in the fight against free radicals. In particular for mature skin, it is important that the cells of the lower layer of the skin have enough magnesium, calcium and phosphorus, which are found in abundance in peat. And peat represents the basic element of the cosmetics line PEAT CARE.

Kaolin represents one of the oldest natural products used in cosmetics already in the times of ancient Egypt, the beneficial effects are mainly the result of its great absorbing abilities, stimulation of defensive mechanisms of the skin, its brightening and cleansing. Carlsbad kaolin, which also led to the world tradition of production of local porcelain, was created thanks to the activity of the hot mineral springs. Its beneficial effects are used by the cosmetics collection line PURE KAOLIN.
Although King and Emperor Karel IV. founded Carlsbad already in the year 1350, news of the beneficial effects of the local thermo-mineral springs did not spread around the world until the 18th and 19th centuries. However, since that time the crowds of guests have kept coming and today Carlsbad rightfully belongs among the most famous spas in Europe.
Our cosmetics are inspired by the city. The quality of the content, natural sources, production, and even the packaging design honor the architecture of the city and its atmosphere and reflect the city’s genius loci. Romantic areas and breathtaking views, grand colonnades and facades of houses and of course the mysterious healing water, all this magic is a big source of inspiration for us. At the same time, we feel and honor the talent, courage and energy of the ancestors who paved the way for us. Our mission is to continue down this path and share the magic with you.
The cosmetics brand CARL’S was created with the aim to provide its users and their skin with the care, freshness and energy of youth every day. During the development of each product, we used not only the beneficial effects of the local natural sources but also the latest findings of modern cosmetics. These are based on the results of scientific research in chemistry, cosmetology and dermatology, their effectiveness has been clinically tested. Through the combination of natural active ingredients and modern ingredient blends, effective technologies are created thanks to which our cosmetics achieve dramatic results.
**S.C.M.S.**

Technology named the Smart Collagen management system S.C.M.S. technology is a presage of the entirely new approach in the work with collagen in cosmetic products. Collagen forms the largest amount of matter in dermis and it gives firmness to the whole skin. Collagen fibres make a supporting grid, which keeps the skin stretched. With approaching age, loss of collagen occurs. The skin loses 2% every year, which leads to undesirable manifestations of aging – loss of elasticity and formation of wrinkles. S.C.M.S. technology keeps the balance between loss and renewal of collagen and it stimulates its creation directly in the skin. Due to this fact, it is an ideal filling of wrinkles in the eye area and prevention of sagging skin formation. The system also eliminates striae and visibly improves appearance of age spots.

**AAComplex**

A collection of rare trace elements, contained in Karlovy Vary’s mineral water, forms together with barley extract, rosmarinic acid and bio flavonoid glycoside rutin, a complex of effective substances, which are actively involved in fighting against free radicals and other factors, which take part in aging process. The resulting anti-aging technology is called AAComplex and within certain products of Carl’s cosmetics creates an effective and strong natural antioxidant, which activates and strengthens the skin’s protection system. Regular use of the above mentioned products stops the early aging of skin.

**Hydratherm**

Pokožka pro svoji správnou funkci potřebuje dostatek To function correctly, the skin needs a sufficient amount of water and energy for its cells. By combining the thermo-mineral water from Carlsbad and highly valuable effective natural substances, technology aimed at skin hydration and skin vitality was created. Contained nucleotide ATP has a vitalising effect in cells and it is the most important supplier of energy to the skin. Seaweed and papaya extracts activate metabolic processes, rejuvenate and optimally hydrate the skin.

**Phyto-Mineral M+M (Milk & Mineral)**

The specially produced milk based on plants, enriched with minerals from Karlovy Vary, forms the main component of this technology. The milk is made of active ingredients such as black cumin oil and aloe vera extract. It provides effective protection against drying skin and transepidermal loss of water as well as support of reverse relipidation. The complex also supports fast renewal of the natural skin barrier.

**Fibromatrix**

The skin is made from 4 - 6 % by collagen. It forms a major part of intercellular matter called extracellular matrix (ECM). Production of this matrix is provided by fibroblasts, small connective tissue cells. The Fibromatrix system is based on a bio technologically produced extract from seaweed. Due to it ECM, whose gradual degradation results in skin aging, is renewed. By stimulating fibroblasts, high quality collagen is produced and the skin is renewed, straightened and stretched.

**Express Anti-Wrinkle Technology**

The technology - especially developed for suppression of appearance and minimising existing wrinkles. It achieves immediately recognisable, intensive and long lasting effects. Due to 4D Face Lifting, it has an immediate effect and very effectively smooths out various types of wrinkles. The effect is scientifically proven.

**AAComplex**

The technology - especially developed for suppression of appearance and minimising existing wrinkles. It achieves immediately recognisable, intensive and long lasting effects. Due to 4D Face Lifting, it has an immediate effect and very effectively smooths out various types of wrinkles. The effect is scientifically proven.
We developed CARL’s cosmetics products with care and respect for the famous local spa tradition. The used natural sources have been tested through many years of balneological experience. They are included in the products of our individual cosmetics lines. The THERMAE line contains thermo-mineral water, the PEAT CARE line uses the effects of peat extract and the PURE KAOLIN collection line the traditionally beneficial characteristics of kaolin.
The day cream which utilises the beneficial effects of thermo-mineral water from Carlsbad gently treats the skin and leaves it hydrated, radiant and silky smooth. The active ingredients provide protection against stress factors, thus the skin becomes more elastic and supple. Other active ingredients give the cells energy, the seaweed extract protects against dryness and creates a protective film on the surface of the skin. The extract of papaya fruit helps to gently exfoliate the skin, activating the metabolism of its cells, thus rejuvenating the skin. The cream is suitable for all skin types and is fast absorbing.

A very effective cream for night treatment of skin activates the process of natural skin regeneration. Minerals from a Carlsbad hot spring, together with hyaluronic acid, revitalize, strengthen and intensively hydrate the skin. Optimal composition of the cream guarantees the regeneration effect with deep penetration into the skin, where it helps to calm the skin, it stops the generation of wrinkles and strongly increases elasticity and firmness. Besides a higher content of shea butter and almond oil, it also contains a lipid base including ceramides, phospholipids, sterols and omega acids and thanks to the special ingredients, it has a lifting effect.

**INGREDIENTS / INCI:** Aqua*, Prunus Amygdalus Dulcis Oil, Cetearyl Alcohol, Butyrospermum Parkii Butter, Glyceryl Glycerol Stearate, Ceteareth-20, Ureganyl Myristate, Bubline Flowers Extract, Avena Sativa Kernel Oil, Dimethicone, Panthenol, Acrylates/CT1-10 Alkyl Acrylate Crosspolymer, Sodium Hyaluronate, Cetyl Alcohol, Disodium Adenosine Triphosphate, Carica Papaya Fruit Extract, Phenoxyethanol, Algin, Sodium Hyaluronate, Phytosterols, Citric Acid, Parfum, Citronellol, Geraniol, Hexyl Cinnamal, Limonene, Linalool, Butylphenyl Methylpropional, α-Isomethyl Ionone, Ethylhexylglycerin, Phenoxyethanol, Propylparaben. Nourishing eye cream for treating the soft skin around the eyes, containing thermo-mineral water from Carlsbad, which together with other natural effective substances help in the anti-aging process. An effective component is also a nucleoid ATP, which significantly help in functioning of all body cells, coenzyme Q10 and hyaluronic acid. The cream gives the skin needed energy and at the same time it protects and nourishes it. The result is a lot smoother and stronger skin around the eyes. Regular application suppresses the consequences of aging.

Relaxing bath containing specific minerals, which are typical for hot mineral water from Carlsbad, with significant loosening and revitalizing effects. It continues the many years of tradition of mineral baths, which began to be used, in Carlsbad, by the emperor and king Karel IV. himself. The bath creates a thin film on the skin, which makes it smooth and refreshed. At the same time, the overall release of physical as well as mental tension occurs.

**Ingredients / InCI:** Sodium Chloride, Mineral Salts, Hydrated Silica, Sorbitan Oleate, Polyvinylpyrrolidone, Caprylyl/Capric Triglyceride, Parfum, C.1.15410, Caramel.
Renew your youthful appearance. A very intensive serum with the addition of Carlsbad thermo-mineral water. It contains active substances having the direct effect against various types of wrinkles, it has been clinically tested. Visible results appear immediately and during regular usage the results are a long lasting. It reduces wrinkles by 74% after one hour from the application. It improves the microstructure of the eye area, helps stretch the skin and make it firmer. Due to S.C.M.S. technology, the serum stimulates proliferation of fibroblasts and activates production of a high quality collagen - it fills wrinkles and stretches the skin.

**Ingredients / INCI:** Aqua*, Sodium Hyaluronate, Glycerin, Hydroxypropyl Methylcellulose, Pullulan, Porphyridium Cruentum extract, Bulbine Frutescens Leaf Juice, Sodium Benzoate, Potassium Sorbate, Citrus Aurantium Leaf Extract, Parfum, Melissa Officinalis Leaf Extract, Disodium Rutinyl Disulfate, Hordeum Distichon Extract, Methylpropanediol, Caprylyl Glycol, Phenethylalcohol. *Carlsbad thermo-mineral water.

Water is the base of everything, nothing can be done without it. Hydrating essence is a special product with a high content of thermo-mineral water from Karlovy Vary, designed for treating the face, neck and décolletage. It uses the positive effects of hot spring mineral water and at the same time it provides an optimal amount of hydration and energy during the whole day. Active substances from Fibromatrix technology stretch the skin and make it firmer. Due to the effective protection against free radicals and their metabolic products, the product also works as a serum for skin longevity.

We bet on the local natural spa sources, whose effects we are still improving. CARL’S cosmetics products use the power of nature and findings from modern scientific fields such as cosmetology, balneology, chemistry and pharmaceutics. We are a Czech cosmetics brand, drawing on experience from two decades of cooperation with leading local and foreign spas. Our clients appreciate that our products meet the daily challenges that our modern lifestyle presents for our skin. The natural active ingredients provide the skin with necessary minerals, hydration and other substances that together actively help to keep the skin looking healthy and protect it against various harmful effects of the environment. The effectiveness and quality of our products have always been of the utmost importance to us, therefore we design our products so that they are comparable to leading products produced worldwide. The choice of effective active ingredients, as well as their exact and sufficient dosage and sophisticated manufacturing processes, makes this possible.

Our products are strictly inspected and evaluated according to the laws of the EU; they have certificates and confirmations of having no microbiological or dermatological defects. The Ministry of Health of the Czech Republic inspects the correct use of natural healing sources. During the production and development of new recipes, we use knowledge from our balneologists and the latest scientific findings. WE DO NOT USE ingredients that can pose a health hazard for users or ingredients with a potential health hazard that has not yet been proven by professionals. There are no parabens in our products. There are also no free dioxins, ethylene oxide, or ethanolamines.

Nature has endowed us with very powerful tools for our work. Our mission is to bring you true beauty from the spa in harmony with nature.
